TwizyCam

Compact / 100% electric / 70 km battery life / Up to 100km/h / Soundless

The TwizyCam is a very compact electric camera car. As well as other electric vehicles it is silent. It was specially developed for the capture of your track shots in confined environment. It is really easy and quick to set it up and it benefits from a very good road handling at speeds up to 100km/h. The TwizyCam comes with one of our gyro-stabilized head to produce perfectly stable images with a great choice of camera/lens combinations. Other options are available to fit the specific need of your shooting: steadycamer shell, vertical lift and crane. The camera and the gimbal are controlled via joystick from the inside of the vehicle or from an outside position. It can be used for film industry as well as broadcast and advertising.

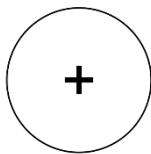

Suitable gyro-stabilization systems:

SHOTOVER F1

SHOTOVER G1

TAILOR MADE

Main characteristics:

- 100% electric, silent
- Max. speed: 100km/h
- Acceleration from 0 to 50km/h in 5 secs
- Up to 70km of battery life
- Great range of camera/lens combinations
- Modular hooks (front/rear/roof)
